

## COEMIG Designee Spotlight Franciscan Health System Washington, USA

Hospitals and surgeons share their perspectives on being certified as an [AAGL Center of Excellence in Minimally Invasive Gynecology \(COEMIG\)](#).

"The COEMIG designation process enabled us to align all of the stakeholders in our gynecologic surgery program, including our surgeons, perioperative staff and women's care leadership. The quarterly interdisciplinary team meetings provide the platform we need to collaborate on the development of clinical pathways to standardize care and promote best practices. With the implementation of the BOLD database, we now have another tool to monitor surgical care and continuously improve outcomes for our patients."

Cindy Mosbrucker, MD, FACOG  
COEMIG Program Director, Franciscan Health System
