

Dr. Carlos Sandoval-Herrera, Master Surgeon in Minimally Invasive Gynecology, Successfully Removes 3Kg Uterus

Chicago, IL 09/10/2018 – On September the 10th 2018, Dr. Carlos Sandoval-Herrera, FACOG, FACS and his Center of Excellence in Minimally Invasive Gynecology team successfully performed a total laparoscopic hysterectomy on a 38-week size uterus, weighing 3.058 Kg or 6 lb 7oz. The estimated blood loss for the procedure was 20 ml.

The patient had an uncomplicated course after surgery and was discharged after 2 days in the hospital.

The patient stated that the procedure has relieved the pelvic pressure she has been struggling with for more than 10 years. She had multiple opinions recommending a midline 18 to 20-inch-long surgery. She also stated that she will be able to begin a new stage in her life.

She is thankful for the team for caring for her and taking the challenge to perform this surgery with minimally invasive techniques.
